

Marketing Campaign EDA

Channel Performance Report & Budget Recommendation — June 2026

Executive Summary

This report analyzes 1,000 marketing campaign records across 6 channels covering Q1–Q4 2024. After cleaning missing values and removing negative-revenue anomalies, we computed key performance metrics: ROAS, ROI, CTR, Cost Per Lead, and Conversion Rate. The analysis reveals dramatic performance differences across channels, with Email and Paid Search delivering outsized returns while Influencer and Display Ads are destroying value. Immediate budget reallocation is recommended.

Data Quality & Cleaning

The raw dataset contained 30 missing click values, 20 missing spend values, and 5 negative-revenue anomalies. Missing clicks and spend were imputed using per-channel medians to preserve distribution characteristics. Negative revenues were treated as data errors and set to zero. After cleaning, the dataset is 100% complete and ready for analysis.

Marketing Funnel Analysis

Across all channels, the funnel processed **25,760,718 impressions** → **1,231,192 clicks** (CTR 4.78%) → **182,018 leads** (Lead Rate 14.78%) → **22,416 conversions** (Conv Rate 12.32%). The steepest drop occurs at the lead-to-conversion stage, indicating that nurturing quality deserves as much investment as top-of-funnel acquisition.

Channel Performance Scorecard

Channel	Spend (\$)	Revenue (\$)	ROAS	Net Profit (\$)	CTR (%)	CPL (\$)	Conv Rate (%)
Email	\$16,079	\$747,813	46.5x	\$731,734	6.27%	\$0.30	13.1%
Paid Search	\$96,854	\$1,262,592	13.0x	\$1,165,738	7.22%	\$1.74	15.5%
SEO	\$24,381	\$271,391	11.1x	\$247,010	3.80%	\$1.57	10.0%
Social Media	\$55,092	\$324,889	5.9x	\$269,797	4.55%	\$1.73	7.2%
Influencer	\$51,407	\$27,486	0.5x	\$-23,921	3.86%	\$9.20	4.2%
Display Ads	\$7,548	\$1,690	0.2x	\$-5,858	2.44%	\$5.39	1.0%

Green rows = top performers. Red rows = budget destroyers.

Key Findings

- **Email dominates on efficiency:** With a 46.5x ROAS and the lowest CPL (\$0.30), Email is by far the most efficient channel. It generates \$731K net profit on just \$16K spend — a 4,550% ROI. The high lead-to-conversion rate (13.1%) confirms audience quality.
- **Paid Search is the revenue engine:** Despite the highest absolute spend (\$96K), Paid Search delivers the largest net profit (\$1.16M) thanks to a 13x ROAS and the best conversion rate (15.5%). High CPL (\$1.74) is justified by strong downstream revenue.

- **SEO punches above its weight:** At 11x ROAS with moderate spend (\$24K), SEO offers compounding long-term returns. Its high revenue-per-conversion (\$150) reflects high-intent organic visitors.
- **Social Media is mid-tier:** 5.9x ROAS and \$270K net profit are positive but well below top channels. The relatively low conversion rate (7.2%) suggests audience mismatch or weak landing pages.
- **Influencer is losing money:** 0.53x ROAS means every \$1 spent returns only 53 cents. Net loss of \$23.9K with the highest CPL (\$9.20) and lowest conversion rate (4.2%). Immediate review required.
- **Display Ads are the worst performer:** 0.22x ROAS and a \$5.9K net loss. The lowest CTR (2.4%) and near-zero conversion rate (1.0%) indicate banner blindness and irrelevant targeting.

Budget Recommendation

Based on ROAS, net profit, and funnel efficiency, we recommend the following budget shifts for the next campaign cycle:

Channel	Action	Budget Change	Rationale
Email	■ Scale Aggressively	+60%	Best ROAS (46.5x), lowest CPL, highest efficiency
Paid Search	■ Increase	+30%	Highest net profit (\$1.16M), strong conv rate
SEO	■ Invest in Content	+25%	High revenue/conv, compounds over time
Social Media	➡ Hold & Optimize	0%	Positive ROI but needs creative/targeting review
Influencer	■ Pause & Audit	-70%	Negative ROI (-48%), highest CPL, poor conversion
Display Ads	■ Cut	-90%	Near-zero ROAS, systematic underperformance

Next Steps

- Run A/B tests on Social Media creatives and landing pages to improve the 7.2% conversion rate.
- Audit Influencer partnerships — assess content alignment, audience overlap, and attribution accuracy.
- Reallocate freed budget (from Display/Influencer cuts) into Email automation sequences.
- Set up monthly ROAS monitoring dashboards to detect performance drift early.
